

Say Anything, We Will Erase All Life On Earth Bu

Gliding through my wasted life
With ants on endless escalators
Mystery rash and no job
Absent muse, oh how I hate her
Could it be this stagnancy was laced in all the lies they fed me
Drown them out with song and friend and drink, ingest this cider, I
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you ingest this?
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you ingest this?
No more scanning skin for bumps, I don't know braille nor do I need the answer
All that I am suffering from is urban fucking cancer
Out into the car I will be eaten by the glowing embers
Search for love, the love I lack
I want my blood, I want it back
Spit it from your mouth like a foreign object
Sing it to the world like a drunken prophet
Spit it from your mouth like a foreign object
Why do you ingest this?
We will erase all life on earth but us
We will erase all life on earth but us
So boo, don't front like you've not heard of us
We will erase all life on earth but us
We will erase all life on earth but us
We will destroy (the bees, two birds and us)
We will erase (all life on earth but us)
