

Scars Of Life, Bullet With Your Name

As were sitting here stareing each other down
you open up your mouth let your lies spew out
what are we doing here its wrong cant you see
you wanna leave me here, and forget about me

You look me, in my face
Tell me Im, a disgrace
you say that your the victim
I say your full of shit

all the times you stuck me here
and put me on my own
I feel the same thats why
I've got a bullet with your name

As were sitting here stareing each other down
I remember how you used to kick me around
look deep in my eyes come take all my pain
I only have just one bullet with your name

GET THE FUCK AWAY!

Look deep in my eyes
come take this pain from me
all I ask of you
is to get away from me
