

# Scooter, The night

Back on the mic I got the sound  
Holding you down, down to the ground  
Speaking the melody  
Who out there got the skills to test me?  
I've been here for far too long  
It's time to break out  
It's time to be strong  
Beats going crazy inside my head  
Everything's alright  
Here comes the night

Chorus:

All my friends are talking to me  
What's this love I see  
I know you can make it right  
I'm still waiting now  
Waiting for the love I need  
If you want me too  
There's something don't understand  
I don't know  
Don't be afraid, it's just my work  
Comin' up bringing the words  
Soon I'll have ya movin' in time  
It ain't my fault, just the lyrics that rhyme  
As I chop, change, rearrange  
Choose and refuse, cause of fame  
Gonna getcha hot like a burning flame  
Everything's alright  
Here comes the night

Chorus:

All my friends are talking to me  
What's this love I see  
I know you can make it right  
I'm still waiting now  
Waiting for the love I need  
If you want me too  
There's something don't understand  
I don't know
