

Scooter, Waste Your Youth

I know a place
A place where we belong
Where we can dance
All night long
Come take my hand
When the lights are gone
We stay awake
From dusk till dawn

Yeah, this must be the place
To attack with the force of the bass

Reset

Seven is the number, the eighth wonder

We got the sound, we're raving fast
Enjoy the night, it might be your last
Wizards on the keys and me on the wire
Believe what I say: we are still on fire

From twelve a.m. to the early morning
You can be sure it's the final warning
I'm raw hot super shot, gonna make your body rock
Tick-Tock got the drop, rave on, never stop

I know a place
A place where we belong
Where we can dance
All night long
Come take my hand
When the lights are gone
We stay awake
From dusk till dawn

When nothing goes right
Go left

As we step in the door we cause panic
Even like the last few minutes on the Titanic

Come on

Keep it up

I know a place
A place where we belong
Where we can dance
All night long
Come take my hand
When the lights are gone
We stay awake
From dusk till dawn

Waste your youth
As we cause fire in the booth
