## Scorpions, Through My Eyes

(Music: Rudolf Schenker; Lyrics: Klaus Meine)

Leaving through the back door Freezing in the cold Communication breakdown Emotional overload Been through a wall of fire Now I feel like, the ashes glow

Cars passing on the freeway My mind is on the run I keep running from my shadow I'm not the only one Somewhere in the distance Someone's taking flight Destination unknown Just fade into the light

There's so much said and done But after all The time has come, to leave it all Behind

If you could see it through my eyes You's know I tried to change it all I've been trying all my life To stand up every time I fall If you could see it through my eyes

I feel sadness up my spine The future on my hands I'm standing here alone With open arms again Tomorrow ain't no stranger There'll be a lucky star And love will find it's way Into someones heart

Too late for tears No time to be confused It's just the echo of our Swan song

If you could see it through my eyes You's know I tried to change it all I've been trying all my life To stand up every time I fall If you could see it through my eyes You'd see that love will always wait Somewhere out there is my life A new love that comes my way If you could see it through my eyes Through my eyes

What was meant to be forever Is breaking all apart What was meant to be forever Leaves the hole inside my heart What was meant to be forever We throw it all away What was meant to be forever Was nothing but a game What was meant to be forever Is breaking all apart What was meant to be forever
