

Scratchingpost, Fade Away

You make things worth it
So good so far
Stay a little longer cause you can't
You cant leave me out
But you drove away from me again,
Hit the road surrounded by your friends,
And here's me alone and cursing you.
Here's me knowing you will
FADE away if my plan works right this time
Fade away never mind just what we find.

I always want this
Its just so right
We've gotta get on with it,
Cause you won't believe this night
But you drove away from me again,
Here's me surrounded by your friends
There's you alone and terrified,
There's you hoping that I

FADE away if my plan works right this time
Fade away never mind just what we find

FADE away if my plan works right this time
Fade away never mind just what we find

Go and find yourself but don't look back at me
Just take it it easy as I sit here and know you will

FADE away if my plan works right this time
Fade away never mind just what we find

FADE away if my plan works right this time
Fade away never mind just what we find
