

Seachange, Avsco10

Mechanical views optics
Im thinking how the man invented perspectives

Council of 10 - so nosey
go sit in the tower until you get real

we want symbols icons
quit messing around with the backgrounds

keep on our terms its important
we have an order to maintain the Empire

I want to spend the rest of my life, everywhere, one to one, always, forever, now

But this is new exciting
Cant you see how we can draw people closer?

It gives context placement
People can relate when they worship

Just one chance please?
Or the people will revert to casinos and sleaze

Council is agreed you may proceed
But you have 6 months in the church or you must leave

I want to spend the rest of my life, everywhere, one to one, always, forever, now

Theres communication a scurried tension
Panic stations well just set for stun

Blame difference in culture a language barrier
Flick thumbnail on teeth do like the Romans did

When you fight you fight well under ancient spell
Manufactured looks guaranteed to sell

He cant look back its never as easy as that
We have our own worlds they take a lifetime to crack

Somewhere along the way a decision was made
Ditch the complex and stick to sex and cash
Ruthless and thorough, from one to another
He keeps it bright and pure

I love your tornado eyes - Burn like a comet across the skies
Trail-blaze through the city tonight
Heading straight for nowhere to fade and die.

I want to spend the rest of my life, everywhere, one to one, always, forever, now
I want to spend the rest of my life, everywhere, one to one, always, forever, now
