

Seachange, Carousel

Made out of something never known
useless descriptions of the things you own
chosen the branch that points to the sun
hack with the ax with one eye on
how are the planets moving this year?
to protect your money, help your career?
bar coded destiny, boxed up for sale
if you look at the sky there's nothing to say

come live with me and be my love
and we will all the pleasures prove
truth in every shepards tongue
as if all the world and love were young

first you say you cant handle it
you cant handle it because you need it - you need it
then you say you dont believe in it
dont believe in it because you want it - you want it
could it be your just playing me, playing me until you ditch it, ditch it
hey i'm going to get through with you, through with you
until you get it, you get it.

Get back to nature and invent some crimes
find all the meanings in the nursery rhymes
sit in the church when the sun shines through
start to believe that its all for you
live more like this, be more like this
listen to this, get with this, with this
exotic ideas they come and go
then left behind like bargain clothes
and so i feel so warm inside
and the guides to living make it feel alright

come live with me and be my love
and we will all the pleasures prove
truth in every shepards tongue
as if all the world and love were young

first you say you cant handle it
you cant handle it because you need it - you need it
then you say you dont believe in it
dont believe in it because you want it - you want it
could it be your just playing me, playing me until you ditch it, ditch it
hey i'm going to get through with you, through with you
until you get it, you get it.
