

Sebadoh, New Worship

There's a lie we've been living through
Think you're all alone, it's not quite true
No one cares, cuz no one should
Everything you see was meant to be misunderstood
Safe & sound, so safe & sound
Move your body back and forth and round & round
And all my friends are killing me, all my friends are killing me
All my friends are killing me; I think I'm a genius
