Sebastian Bach, Negative Light

Nothin' lasts forever Nobody rides for free For twenty years I took a stand You're not takin' no chance on me

Some slow to anger Some quick to hate When you've given all you got And you just can't satiate

We all live in negative Can we ride to the light?

Deal in desperation Peddling in spite If it's a war you're lookin' for You won't look far tonight

I'm sick of restitution
Paying back in blood
All I ever wanted was a little action
And maybe just a little love

We all live in negative Can we ride to the light?

Why you gotta make it Harder than it has to be? We could come together And show the world we're free, break free

Negative light comes to me out of the shadows Negative light gives me what I need Negative light gives me what I need Negative light, the part of me I don't want you to see Negative light gives me what I need Negative light
