

See Spot Run, Girl Like You

I can't believe what I'm feeling
You gave my heart a shake
And now I lie awake thinking'

Where am I gonna find another girl like you

It's like I've known you for a lifetime
We share our hopes and dreams
And all that whipping cream too

Where am I gonna find another girl like you

Can't make up your mind
Where you wanna be
Let me into your wild fantasy
I know we were made for each other

I can't believe what I'm hearin'
I can't take it anymore
It won't be long before I break

Where am I gonna find another girl like you

Can't take it anymore
It won't be long before I break

Where am I gonna find another girl like you
Another girl like you
Where am I gonna find another girl like you
Another girl like you
Where am I gonna find another girl like you
