

# See Spot Run, That's What I Say

Do you ever listen to what I say  
Do do do you remember one bit of it  
Or am I in the way

I told you all I ever wanted was to  
Be the wiser and get out of this  
How long will I be payin'

That's what I say, when I'm leavin'  
That's what I say, when the feeling starts to get me down  
That's what I say, what I believe in  
When everything I've said to you  
Leaves me nothin left to do

Would you like to spend a whole night in bed

Do do before we give it up and all of that  
How would you like to play

Have you ever thought about the consequence  
When everything is compromised and stuff  
We can't live for yesterday

Do ya ever think about the time we met  
Do do do you remember what I think you said  
Or has it all gone grey

And while we're on the subject of discontent  
Do you always gotta bring it up  
How long will I be prayin'
