

Self, Dog You Are

We all know we're ruining this town
Everybody knows we're ruining this town
Why'd you go and bring us all down
It's all just for show
The sights consume the sound

And I'll be sure to run you off
A copy of the things I thought
Put it in lights for all to see
So you can jot it down & read it back to me

You know we're leaving this town
Everybody knows we're leaving this town
Why'd you have to pry and sniff around
Someone else's life that you don't even know

And I'll be sure to jerk your chain
I'll let you loose into the yard
Your bite is much worse than your bark
So hunt it down like the dog you are

Is it that there's nothing better on your mind?
I can think of ways to pass the time
Is it that the only world you know's unkind?

Like it's not hard enough to breathe
Cleaning all my skin from your teeth
Your bite is much worse than your bark
So hunt it down like the dog you are
So hunt it down like the dog you are
So hunt it down like the dog you are
So hunt it down like the dog you are

We all know we're leaving this town
Everybody knows we're leaving this town
Why'd you go and brings us all down
It's all just for show, the signs consume the sound
