

Self, Evolution

Every time we talk, take a walk, was it good now?
The sky is gonna fall on us all for sure
Are we led along? Are we skin and bones, just for show?
Is there a solution or is it just evolution
I don't know

Baby take a bow to us now, put me in my place
Elevated sound coming down to the floor
The strongest shall survive
Be glad that you're alive tomorrow
Is there a solution or is it just evolution
I don't know

Ooh ooh

Every time we talk, take a walk, was it good now?
The sky is gonna fall on us all for sure
Are we led along? Are we skin and bones, just for show?

Is there a solution or is it just evolution
I don't know

Ooh ooh

Is there a solution or is it just evolution
I don't know
