

# September When, The Hide Queen

In the open, come with me  
In the open, come with me  
You are the best I've seen  
something about your eyes  
(They're so mysterious alive)  
You've got the coolest look  
that you try to disguise  
(You keep away from the light)  
You are most glad of all  
and you got the brightest mind of all  
and you know for sure  
saying love is great  
but oh how you can hate (I know you)

Chorus:

They say you are the hide queen  
cos you are never really to be seen  
and I know you once had a dream  
to be yourself, but you could never be  
Somebody painted & coloured you  
and told you all the things to do

This is right, this is wrong

Now I understand  
catching the blood that flows

Chorus
