

# Sesame Street, Beep

Muppet #1 (sung): If it says one, then I go beep.  
If it says two, then I go beep beep.  
If it says three, then I go beep beep beep.  
And that's the way it's done.

Muppet #2 (spoken): Yeah, but what if it says four?

Muppet #1 (sung): I go beep beep beep beep, nothing more.

Muppet #2 (spoken): But what if it says more than four?

Muppet #1 (sung really fast): Then I go Beepbeepbeepbeepbeepbeepbeep-  
 (into incomprehension, and screen fills up with circles)

Muppet #2 (spoken): Like what if it says forty-six?

Muppet #1 (sung really fast again): Then I go Beepbeepbeepbeepbeepbeepbeep-  
(into more incomprehension, and the screen fills up with forty-six circles)  
(sung at normal speed)  
Now, I used to get confused about my numbers,  
Whether it was three or one or four or two.  
But now I find my numbers very easy,

'Cause this is what I do ...  
If it says one, then I go beep.  
If it says two, then I go beep beep.  
If it says three, then I go beep beep beep.  
And that's the way it's done.

Muppet #2 (spoken): Yeah, but what if it says four?

Muppet #1 (sung): I go beep beep beep beep, nothing more.

Muppet #2 (spoken): So when it says one, you go Beep (and so on, repeating all the verses)

Muppet #2 (spoken): But what if it says three million, seven hundred forty-six thousand, nine hundred

Muppet #1 (spoken): That's easy, man.  
(sung really fast): Then I go Beepbeepbeepbeepbeepbeepbeep-  
(into still more incomprehension, and screen fills up with still more circles. I think this is one of those

Both: Beep beep beep beep, beep beep beep!
