

Sesame Street, Between

When there's cheese in the middle
Of two slices of bread
It's between, between
And when you slip into the sheets
Of your comfy bed
You're between, between

Whenever that is on that side
And this is on this
Right there in the middle
Is right between sis
Between, between, between, between

When you're driving in a car
Inside the painted lines

You're between, oooh between
And if there's cream inside the cookie
That you're gonna bite
It's between, between

Yeah when there's someone on one side
And someone on the other
Right there in the middle
You're right between brother
Between, between, between, between

Now you know what I mean
By between, between
