

Seven Shed, She Left Me On Friday

She Left Me On Friday

She left me on Friday, and ruined my weekend
She thinks we're still best friends, she thinks we're still alright.

She's playing her mind games, got into the fast lane
Drove off to some bright lights

To find out if all the places that shine, are anything like mine-no, no

She left me with no hope, it's all gone up in smoke
She didn't invite me, rode off with a donkey

To find out if all the places that shine are anything like mine
To find out if all the style she's got s'gonna push her to the top

She left me on friday, and put me in limbo
She's stolen my ego and now its a no-go, go, go, go

She left me with no hope, it's all gone up in smoke, she didn't invite me

To find if all the places that shine are anything like mine
To find out if all the style she's got s'gonna push her to the top
To find out if all the Fridays you choose are where you'll still lose

She left me on Friday and ruined my weekend
She thinks we're still best friends she thinks we're still alright

To find if all the places that shine are anything like mine
To find out if all the Fridays that come are gonna make you feel welcome
To find out if all the style you've got s'gonna push you to the top
To find out if all the Fridays you'll choose are where you'll still lose!!
