

Sex Appeal, Here We Go

Baby baby you know you drive me crazy
And ive been waiting for you all night long
Come to the party and let me be your barbie
And well be singing to the raggae song

Its not a shame
Its more than superstitious
Just play the game
And take me to the show

Here we go - here we come
Just take me by the hand
Come on - we gotta go crazy
I know that you can
Have some fun
And let me be the one
Tonight - no need to be lazy
Here we go - here we come

Move your feet and shake your body
To the rythem of the drum
Here we go - here we come
Till the morning light is dawning
And the moon is on the run
Were having fun

Baby baby only wanna be your lady
Cause ive been searching for a heart of mine
Just take your changes and let me be romantic
And well be dancing till the end of time

Its not a shame
Its more than superstitious
Just play the game
And take me to the show
