

Shane Minor, Easy To Believe

(Gary Harrison/Richard Marx)

The rumor's true, I got the news
They're closing up the doors
Two weeks and they won't need me anymore
All I know is work and home
And back again each day
At a loss I look no farther
Than those gates
But then you roll the world off my shoulders
And all my troubles seem to disappear

You make it easy to believe
And live without a doubt
With nothing to hold onto but dreams
That everything works out
You always see the good in me
Your love is so easy to believe

In the face of a world gone crazy
You're the steady hand
The northern star, the beating heart
Of this working man
You figured out what really counts
Long before I knew
As time goes by I'm growing wiser
Loving you
My dreams can shatter but all that matter
Is ever after by your side

You make it easy to believe
And live without a doubt
With nothing to hold onto but dreams
That everything works out
You always see the good in me
Your love is so easy to believe

I have fallen as deeply in love
As a man can go
Still as each day passes by
My need for you just grows

You make it easy to believe
And live without a doubt
With nothing to hold onto but dreams
That everything works out
You always see the good in me
Your love is so easy to believe
And live without
