Shannon Noll, Everything I Wanted

The past is history You can't go back and make it alright You never get to choose if you win or lose That's not how it goes,oh no

I know I had it all How much more could anyone have? And now I'm tryin to find what used to be mine Before I went away

Chorus
Everything I wanted
Was everything I left behind
I never knew what I'd lose
And everything I needed
Was standing right in front of me
Now I know that it's true
Everything I wanted was you

How can I explain Looking back I know I was wrong I just couldn't see the forest for the trees What more can I say

Chorus

Don't say all our bridges are burned After all the lessons I've learned Is there a chance that you could be mine Or am I wasting my time

Everything I wanted Everything I dreamed about Was everything I aready had

Chorus
Everything I wanted
Was everything I left behind
I never knew what I'd lose
And everything I wanted
Was standing right in front of me
Now I know that it's true

Everything I needed And everything I wanted Now I know that it's true Everything I wanted Was you
