

Shelby Starner, Empty Mind

Go tell your child shes got to be like a woman
Tell her everything she once knew has no meaning
They want to know what we are, not what we could be
I never thought I was special but I hear I used to be
Why do always shadow what we are
Why do I pick up the pieces you leave?
My hope is that I can just sleep through one night
What I say falls into the shadow of an empty mind
Yes I do have a problem with their lying filthy mouths
And I feel that I could have prevented their walking all over me
And i know I make them
And its just their way of saying we make the rules and if you dont like it
Then dont play
Get out my dusty boxing gloves
The bell has rung and Im gonna take a chance with this war
Ive got my case and Im gonna take this jury by surprise
You act like youre not listening and its all just fine
What a change I can see my shadow
I decide when I come and when I go
Its easier to watch them be what they are
Its easier to be a good liar when it comes down to you
You got a lot you didnt tell me and a lot you didnt do
Why do you always shadow what you are?
Why do I pick up the pieces you leave?
My hope is that I can just sleep through one night
What I say falls into the shadow of an empty mind
