

Shelter, In Praise Of Others

Well, it's hard to glorify others due to my
Intense pride

Even amongst friends you'll find I sit and criticize
That's what I do best, it's how I forget my actual size
A leash that ties me to this world

Yeah, a wicked mind brought me to this world, Lord, please help me move forward
I've been guilty so long, I know that I'm wrong, please help me sing this song in praise of others

In praise of others

In praise of others

In praise

Can I glorify others, my sisters or my brothers or anyone else?

Each fault that I find in you I find tenfold in myself

Envy, a disease, it's inside of me

But I'm the loser in the end

Yeah, a wicked mind brought me to this world, Lord, please help me move forward

I've been guilty so long, I know that I'm wrong, please help me sing this song in praise of others

In praise of others

In praise of others

In praise

Hey

I should have blamed myself

Instead of everyone else

But God forbid they find fault with me, we're instant enemies

How dare I see myself honestly as others may see

A proud fool, I turn away, won't hear what they say, it might benefit me

But I remain tied in this net of pride but I wanna be free

Yeah, a wicked mind brought me to this world, Lord, please help me move forward

I've been guilty so long, I know that I'm wrong, please help me sing this song in praise of others

In praise of others

In praise of others

In praise

Praise of others
