

Shenoah, Under Black Skys

Drifting in and out of this
Eternally restless (lost)
Your lights a guides me
Through the darkest parts of you
Several moments unaccounted

Before you go, just remember what you told me
You said you'd be there under these black skys

The memory of what you spoke
Is all I cling to
The quest to find who you are
The rest of your life is waiting out there for you

Before you go, just remember what you told me
You said you'd be there under these black skys

(Before you go, remember what you said)

Before you leave this world
Let me be in your eyes
As you walk away
Last time to what we used to be

Before you go, just remember what you told me
You said you'd be there under these black skys

Before you go away
(Before you leave remember everything)
Before you go
Before you go away
(Before you leave, leave me, remember everything)
Before you go away
