

Sheryl Crow, Long Way Back

I got an up close glimpse of the outside world
It's an awful big place, well that's for damn sure
Seen more of this life than most have seen
It's taken a mighty toll on me
Ah it'd sure feel good to be free

Some days I feel alright
Some days can't wait until it's night
Sometimes you gotta face that light
Get back in the ring, put on your gloves and fight
I think it's gonna take some time
To find a way to ease my mind
Gonna take the long way back home
I'm gonna take the long way back home

Did you ever see a man have a heart attack
It'll open your eyes, stop you in your tracks
Threw away my last cigarette
Get it right this time, I'll clean up my act
Yeah, it's a cold, hard fact

Some days I feel alright
Some days can't wait until it's night
Sometimes you gotta face that light
Get back in the ring, put on your gloves and fight
I think it's gonna take some time
To find a way to ease my mind
Gonna take the long way back home
I'm gonna take the long way back home
Back home

So many things I ain't done yet
So many things I've done I'd soon forget
Just need a place to rest my head

Some days I feel alright
Some days can't wait until it's night
Sometimes you gotta face that light
Get back in the ring, put on your gloves and fight
I think it's gonna take some time
To find a way to ease my mind
Gonna take the long way back home
I'm gonna take the long way back home
Back home
I'm gonna take the long way back home
I'm gonna take the long back home
Back home
