

Shifty, A Better Place

I wish we could live forever
but everyone dies
everyone laughs
and everyone cries

i'll be mad but im glad
you were part of my life
make sure you stop by my dreams
when im sleepin' at night

now a piece of my heart
is lookin' down from the sky
like an angel on my shoulder
helpin' me to get by

and all the words that you told me
were the words of the wise
to navigate my path
through the drama and lies

CHORUS:

I wont forget you
and i'll keep on loving you
but its hard to live my life
when you are not around
I'll try and make it through
i know you want me to
but its hard to think of you
without me breakin' down
I know your in a better place
i know you finally feel the pain
i miss you my best friend
i'll never find someone like you again

i try to stay optimistic
but it hurts so bad
for me to lose the best friend
that i probably ever had

now every day that i wake
i see how precious life is
maybe someday you'll come back
as one of my kids

Its crazy things change
how hard life can be
i remember we were young
everything seemed so easy

i had you by my side
and i thought you'd never leave me
and even though your gone
you still never will believe me

CHORUS

were born to live
and we live to die
walk on the ground
and soar through the sky

and were born to live
and we dont ask why
transend and reside

when stone angels cry

were born to live
and we live to die
walk on the ground
and soar through the sky

and were born to live
and we dont ask why
transend and reside
when stone angels cry

CHORUS

(were born to live and we live to die)
I know your in a better place
(were born to live and we dont ask why)
I know you finally feel the pain
(were born to live and we live to die)
I miss you my best friend
(were born to live and we dont ask why)
i'll never find someone like you again
