

Shinedown, Sin With A Grin

Take a good look at agony
Force fed pass down time release
I'm inspired to find the liar
Black list X on the back of a soulful man
I've got ways you understand
Look left, look right
But I'm behind you
I never noticed
Until I focused
On everything you did, you said
You lit the fuse inside my head

[Chorus]
Thank you for reminding me of why I'm sick inside
Thank you for the venom
Did you think it would paralyze
These scars
I scratch
I tear
Are there
Under my skin
Where you've always been
Thank you for reminding me to sin with a grin

Hangman standing on a twisted 2 by 4
Built your house but forgot to lock the door
I'm inside
With two black eyes
I have not one shred of sympathy
I have no use for apologies

I'm inspired to find the liar
I never noticed
Until I focused
On everything you did, you said
You lit the fuse inside my head

[Chorus x2]

Sin with a grin
Sin with a grin
