

# SHURA, White Light

You're different, I like it  
You're from another planet  
I'd like you to take me there  
We can fly away laying in the spaceship  
You're different don't hide it  
That's what made me notice you  
There you were sitting by yourself  
There you were

You are a white light  
Stepping out of the dark  
You are a white light  
But you're covered in love  
Do you wanna fly me miles away  
And be all alone  
'Cause I don't mind if we never go home  
Stepping out of the dark

And shoulder to shoulder  
Leaving for your universe  
And I can't control you  
And I can't control you  
And there you are so self-contained  
There you are

You are a white light  
Stepping out of the dark  
You are a white light  
But you're covered in love  
Do you wanna fly me miles away  
And be all alone  
'Cause I don't mind if we never go home  
Stepping out of the dark
