

# Silent Force, We Must Use The Power

In the mouths of Hungry children  
Still they have hope in thier minds  
Whispering amongst the others  
What is left to leave behind  
We can feel, like we have been blessed  
Lucky to have roofs over our heads  
Now, I have seen a light  
Now, Let us do what's right...

We must use our power  
We all have inside  
We must use the power  
Help man to survive  
We must use the power  
This is something we must do  
We must use the power  
Someday it might be you  
Listen to your heart, to your heart

Ever wonder what will happen  
If you would lose, what you have  
Will the people come to help you  
Or leave you stranded with no plan  
That is when you'll find out who true friends are  
Thier the ones who'll be there when you're down

Now, I have seen a light  
Now, Let us do what's right...

We must use our power  
We all have inside  
We must use the power  
Help man to survive  
We must use the power  
This is something we must do  
We must use the power  
Someday it might be you  
Listen to your heart, to your hear
