

Simple Minds, Saturday Girl

And your love comes tumbling down
And you walk right in, your heart going round
You tell me that you'll be back early
But you know I'll be a while

Chorus:

Ooh Saturday Girl
Ooh Saturday Girl
When you drop by, I want to see you cry
Ooh Saturday Girl

When you go through the tunnel of life
You're gonna open your eyes
But you could cut the atmosphere with a knife around here
'Cos you know there is no compromise

Chorus:

When the moon lights up the street like diamonds
And all is still and quiet once again
I like to pull you here and whisper in your ear
Tell you what about the loney man

Ooh Saturday Girl

Is somebody there
I said is somebody there
I can see you there
I can feel you there
I know that love is around
I know that it's gonna be right
I know that it's gonna be right
If I could meet you over there
I would come over there
I know it's gonna be alright

Chorus:

Just think about it
Aah think about it
Come on think about it
Go on think about it
Just think about it
Go on think about it
Ooh, come on think about it
