

Simplified, Six Strings And A Bottle

Time to leave
Time to go
Leave it all behind and take it slow
Two bags of ice and we're on the road
We got Sublime on the radio

You name the place
You name the time
You know you'll always be a friend of mine

For you I'll be there
Six strings and a bottle
You know I will

Sun is down
We gather 'round
Acoustics strumming
Yeah we're getting down
Light it up and pass it around
One love like Marley found

Won't you love me yeah love me
Just lay me down
Always smiling when you come around

For you I'll be there
Six strings and a bottle
You know I will

Big full moon
Long time since noon
Too hard to stand
Blankets in the sand
And a comfortable sigh
Just you and I
Arms around you
Looking at the sky

You got something I need
You got something I want
You got something that's calling me
Calling me

You name the place
You name the time
You know you'll always be a friend of mine

Won't you love me yeah love me
Just lay me down
Always smiling when you come around

For you I'll be there
Six strings and a bottle
You know I will
