

Since By Man, It's Just That Kinda Night

it's the eve of the apocalyse
and all anyone wants is a date
it's the end of the world
and all i want is you
count down count down count down to the zero hour (x2)
breathe cause this is it
close your eyes i need it
just breathe girl you gotta come up for air
and baby you you are why i stare stare
i will write around you in chalk
and draw you out
just look girl you gotta open your eyes
our blood is spilling spilling like my lies lies
keep an eye on the clock and cause time is up
what do you say time us up
please end with me
it's the eve of the apocalypse
and all anyone wants is a date
it's the end of the world
and all i want is you
times up (x4) girl
you got me just say say when
