

# Sinn, Scars (Save The Planet...)

See the flame of our modernity  
Burning all the plains around  
These are the last days.  
Extinction flows like a river of blood  
Earth faces a bleak future  
These are the last days.  
Self destruction  
Death is what we' ve left behind  
Self destruction  
And the sun will no longer shine

See, the earth is dying  
See her burning  
See her bleeding  
See, the earth is dying  
See her burning  
And mankind doesn' t care

Earth is lying lifeless on dead plants,  
With fallen trees thrown around  
This is the last breath.  
Our poison is running trough her veins  
Rain, the earth is shedding tears  
This is the last breath.  
Self destruction  
Death is what we' ve left behind

Self destruction  
And the sun will no longer shine

See, the earth is dying  
See her burning  
See her bleeding  
See, the earth is dying  
See her burning  
And mankind doesn' t care

Save the planet  
Kill yourself  
Save the planet  
Save the planet  
Kill yourself  
Save the planet

See, the earth is dying  
See her burning  
See her bleeding  
See, the earth is dying  
See her burning  
And mankind doesn' t care

Self destruction (x8)
