Sinner, Last Dance

This is the last dance The last kiss goodbye This is the last dance Our love will never die

I'm walking down the backstreets She's got her eye on me I showed her no mercy And shadows surrounded me Open eyes beyond the windows It took only one look She plays it tough She breaks the rules

Don't throw it all away I'm standin' in the rain Loneliness in an axe that cuts If you need me call my name

This is the last dance

Then I saw you dancing In the deep red light Why can't this night Go on forever I guess I tried too much We were hungry for love We take it up to the limit And lose control

She hides her face It was more than I romance It's hard to love a man like me I need another chance

This is the last dance The last dance

Just call my name And I'll come running back Into your life And if you need my love Just call my name

This is the last dance Oh no, no This is the last dance Oh no, no, no, no, no, no, no, no
