

Sissel, Fire In Your Heart

Go to the land with the heaven aglow
Go to the home of the troll and the snow
Lead your dream by the hand
To wonderland

Go for the future you know you can win
Go for the goal that you carry within
Go where wishes come true
I'll go with you

Climb the mountains, show me your heaven
Lend me your hand when I go astray
Life is magic when we're together
Close to you is where I will stay

You've got a fire in your heart
I need your flame to warm me when we're apart
When the world is dark I'll share your light
You'll make my world a star in the night

Love is forever with you as my friend
When I am tired you cheer me again
You're my force when I fight
This game called life

Climb the mountains, show me your heaven
Lend me your hand and I'll go astray
Life is magic when we're together
Close to you is where I will stay

You've got a fire in your heart
I need your flame to warm me when we're apart
When the world is dark I'll share your light
You'll make my world a star in the night

Climb the mountains, show me your heaven
Lend me your hand and I'll go astray
Life is magic when we're together
Close to you is where I will stay

You've got a fire in your heart
I need your flame to warm me when we're apart
When the world is dark I'll share your light
You'll make my world a star in the night

You'll make my world a star in the night
