Sissel, Fire In Your Heart

Go to the land with the heaven aglow Go to the home of the troll and the snow Lead your dream by the hand To wonderland

Go for the future you know you can win Go for the goal that you carry within Go where wishes come true I'll go with you

Climb the mountains, show me your heaven Lend me your hand when I go astray Life is magic when we're together Close to you is where I will stay

You've got a fire in your heart I need your flame to warm me when we're apart When the world is dark I'll share your light You'll make my world a star in the night

Love is forever with you as my friend When I am tired you cheer me again You're my force when I fight This game called life

Climb the mountains, show me your heaven Lend me your hand and I'll go astray Life is magic when we're together Close to you is where I will stay

You've got a fire in your heart
I need your flame to warm me when we're apart
When the world is dark I'll share your light
You'll make my world a star in the night

Climb the mountains, show me your heaven Lend me your hand and I'll go astray Life is magic when we're together Close to you is where I will stay

You've got a fire in your heart I need your flame to warm me when we're apart When the world is dark I'll share your light You'll make my world a star in the night

You'll make my world a star in the night
