

# Sister Seven, This The Trip

Mile high in the sunlight  
Your sex is radioactive  
Neutron smash if I fall to ash  
It would be the way to go  
Red hot heat I could feel complete  
With your liquid drip all around me  
Could you come, come on give me some  
Your curves could drive me home.

This the trip, trip on baby come along  
This the trip, trip on with your give me some  
This the trip, trip on baby come along  
This the trip, trip on with your give me some

Hung high in your desert sky  
I've been through the sundance  
Some will say there's another way  
But I'll take the surest road

We got love and we rise above  
Well your pulse is my condition  
Picture fall from upon the wall  
Lose the sting of a lover gone

This the trip, trip on baby come along  
This the trip, trip on with your give me some  
This the trip, trip on baby come along  
This the trip, trip on with your give me some

I don't need no, hang my head  
Love is proud or love is dead

This the trip, trip on baby come along  
This the trip, trip on with your give me some  
This the trip, trip on baby come along  
This the trip, trip on with your give me some
