

Sixx:A.M., Gotta Get It Right

I remember the first time
It was one of the worst times
You lied right to my face
Oh the way that you stood there
You gave me a death stare
The kind you cant erase

When the angels break their wings
The crash and stumble
Just like we struggle

If we could have this one night over
Gotta get it right
We gotta get it right this time

Cause we were young and indestructible
Gotta get it right this time
With any luck we'll be unstoppable
Gotta get it right this time
And we can last forever

I remember the last time
More than all of the past times
And how you crawled away
You followed the passion
Such overreaction
But you never thought to stay

When the angels break their wings
The crash and stumble
Just like we struggle

If we could have this one night over
Gotta get it right
We gotta get it right this time

Cause we were young and indestructible
Gotta get it right this time
With any luck we'll be unstoppable
Gotta get it right this time

And there's a chance for us tonight
And there's a chance to make it right

Cause we weren't young and indestructible
With any luck we'll be unstoppable

We were young
We were young
We gotta right
We were young
We were young

And we can last forever
