

Skeeter Davis, Something Comes Over Me

You ask if I love you I don't know how to say
Just how much I love you let me prove it this way
Something comes over me something takes hold of me
It just won't let go of me when I'm with you
Somethinmg goes down my spine when you tell me you're mine
Something comes over me that something is you

You ask how long I'll love you you had nothing to fear
You should know that I'll love you as long as when you're near
Something comes over me...
I think that is you oh it's gotta be you
