Skin, Take Me On

Ive seen a picture Of you and me Youre looking violent Im looking pleased

You got a face like a television That keeps switching off Im a free believer But thats not enough for you

Chorus You gotta take me on Gotta give me what I want Gotta take me on

Dont need a saviour Dont need a queen Gonna win with the sinners Gonna sin where youve been

Press the button called spacebar So we can see what you mean Ive seen the future But its not enough for you
