

Skin, Tear Down These Houses

Sometimes what you say
Confuses what you mean
A mouth of strangled words
Come spinning out your mouth
Nothing's like the dream
Forget the words I say
Just let them hit the ground
As long as we can
Tear down these houses
Tear down these houses
You can run away
While I protect the way I am
There's comfort in the pain
Ripping through my heart
That kicks you when you're land
Stand down on your demons
'Cause no one wins this war
You've sharpened your weapon
For another useless cause
There'll be no survivors
As long as we can
Tear down these houses
Tear down these houses
What have you done to me
And what have I done to you
Facing each other to the death
No other soul to witness this
A mass of strangled words
Come spinning out your mouth
It's nothing like a dream (nothing like a dream)
It's nothing like a dream (nothing like a dream)
As long as we can
Tear down these houses
As long as we can
Tear down these houses
What have you done to me
And what have I done to you
