

Skinlab, Promised

Everything I have said to you
You could not take away
And everything I've done to you
You let me seep beneath your skin

But you try and you try to burn me
Oh, let me black malice
You'll see your darkness, rusted gun to your head
Won't let you love again

Time won't heal these wounds
Won't love
Yeah, I promised you I would not do it
I promised everything to you
But you try and you try to burn me
Oh, let me black malice
Won't love again

Time won't heal these wounds

Yeah, I promised you I would not do it
I promised everything to you
Won't love again

Taking whole
Let my soul
Thank you Jesus Christ for letting me live
Taking whole
Let my soul
Thank you Jesus Christ for letting me live

Taking whole
Let my soul
Thank you Jesus Christ for letting me live

Won't love
Won't love
Won't love again
