

# Skrewdriver, Strikeforce

I want to tell you about south africa, and the so-called fight for freedom  
The much praised black resistance, and the communists who lead them  
Not too far away in angola, or nearer home in zimbabwe  
The marxist backed dictators are looking south in fear to see

Ref: strikeforce, white survival  
Strikeforce, yeah  
Strikeforce, kill all rivals  
Strikeforce, into the devil's lair

Well her neighbouring regimes are enemies, although we're too blind to see  
That they're harboring the marxist murderers of the terrorist anc  
And the leaders of the west use sanctions, and scream "what about the human rights?"  
But they don't tell the truth, 'cos they're traitors too  
What about the whites that die?
