

Skycamefalling, The Elephant Graveyard

Drowning with you

We just sleep like dead weights in water and I'm drowning with you

Sending them out, floating back to shore

Cause where there's black there always blue

Shears were made to cut right through

You can feel it in you

And we all die here beautiful

Find space to pull the needles through

They'll never find me in here asleep

Sending them out around us

They will never find me
