

Skyfire, From Here To Death

Forever left behind
Behind what was meant to be
Destroying the worlds around me
With powers from inside
My soul is fading away
Yes I have been led astray
By an unknown cosmic force
I'm entombed within myself
With this world as my enemy
Inside the darkest mind
There is no light, there is no hope
Black is the color of our life
Inside the darkest mind
There is no light, there is no hope
Black is the color of our death
From here we are, from here we were
My hatred lives on through the ages
I surely will die with pride in my heart
From here to death, from here to nothingness
The only thing I feel is hate
Abomination for life itself
Dark surrealistic images are surrounding me
Beyond our own unavoidable death
