

Skywalker (CZ), Way Down

Heading straight for disaster
I put on a blindfold
I tried to be my own master
I tried to be ice cold

But you can't teach me a few new tricks
Wear a face that fits
Build a Wall of Ice
When all we needed was a sunrise

I can only run away
Or turn around
Only you can make me stay
Or help me drown

Will you wait for me, wait for me
When I'm on my way down
Will you save me & set me free

I ran faster & faster
With ears plugged and eyes closed
Leaving mountains and oceans behind me
Safe in a place unknown

(Wait for me, wait for me)

I can only run away
Or turn around
Only you can make me stay
Or help me drown

Will you wait for me, wait for me
When I'm on my way down
Will you save me & set me free
Am I lost or am I found

Leaving mountains and oceans behind me
Safe in a place unknown
