

Slade, See Us Here

See us here, see us there, pick us out anywhere.
Take a look, we're everywhere, so what makes you stop and stare?
Look at them there, their eyes bent to the ground,
Trying to see their way around.
Don't try to confuse me.

Take our time, take our care, don't break our hole from anywhere
Ain't got time to shed a tear
What we want we'll take from here
Look at them there, their eyes bent to the ground,
Find it hard to move around.
You dare not accuse me

We'll never get a chance to be left alone - this way, hey hey
Never get a chance to be left alone.
Can't I get it through that I'm on my own?

See us here, see us there, pick us out anywhere.
You can see us everywhere, so what makes you stop and stare?
Look at them there, their eyes bent to the ground,
Trying to see my way around.
Don't try to accuse me.
