

Slaughter, Disintegrater

One thousand miles per hour
like the streak of light
lightening smashes silence
blinding in the night
fireballs from Hades
colliding with the earth
witness frantic comets
the age of Hells rebirth
Smashing the sound barrier
break open suns at will
gaining on you faster
leaves jet planes standing still
scorch the moon to cinders
melt metal into lakes
Disintegrater likes it
Disintegrater takes Hiroshima was no match
dwarfed by this desolation
the haulocaust was nothing
by Disintegraters salvation
the Earth is smashed to pieces
universal rise and fall
the stars are now a waste land
Disintegraters called
