What happened to you

You're not the same

Something inside your head made a violent change

It's call it religion

You're full of shit

Was she really worth it?

She cost you your life

She'll never leave your side

She's gonna be your wife

It's in yor head

Filler

You call it romance

You're full of shit

Your brain is clay

What's going on?

You picked up a bible

And now your gone

It's in your head

It's in your head

It's in your head

You call it religion

You're full of lshit

You never knew

You never did

You never will

You call it religion

You're full of shit
