

# Slayer, Implode

So is it just me or everyone can see the world drowning in its own blood?  
Humanity's declined, spanned over time, a fossil drying in the mud  
It's deception and decree that germinate and see how deception growing all around  
Is this beginning or the end? In darkness we descend and I can't wait to see it all go down

Standing in the room only for World War 10  
Front row center to the ultimate end  
Mankind comes to believing this sloth  
Take on the charades till we murdered our souls

Like a fire storm reaching out of control  
Demons reaching all, it's taking its toll  
And deep down in your personal hell  
Fishing out to everyone but never yourself

Implode with resurrection and divine  
Implode extermination of the swine

Sick of this shit called power scene  
Lash on forth, give them what they need  
Bring all the devils in the world, conspire  
Acting with malice, only feel the fire

No wonder people of religion are obsessed  
All they want from us you shall get  
Arrogance will never lift the fools' regime  
Know you gonna understand what I mean

Implode with resurrection and divine  
Implode extermination of the swine

So many stupid fall, I said it a million times  
There's nothing looking over us  
It's just mistakes you made out of your own hate  
The personality in each of us

Society will bleed so what's it gonna be  
Destructive road or go  
And if I do the wrong through teachings of a song  
I'm pretty sure that God still hates us all

Standing in the room only for World War 10  
Front row center to the ultimate end  
Mankind comes to believing this sloth  
Take on the charades till we murdered our souls

No wonder people of religion are obsessed  
All they want from us you shall get  
Arrogance will never lift the fools' regime  
Know you gonna understand what I mean

Implode with resurrection and divine  
Implode extermination of the swine
